

JOANNA MUĆKA

QA ENGINEER | BACKEND & API TESTING | TEST AUTOMATION | SQL

AVAILABLE IN 1 MONTH

LINKEDIN

PROFILE

QA Engineer experienced in functional, integration, E2E, and UAT testing, REST API testing, data validation, and backend defect analysis. I verify microservice-based systems, analyze RabbitMQ service-to-service communication and logs to identify root causes, and validate the quality of changes in CI/CD processes. I combine a technical approach to quality with a UX/UI perspective, assessing both functional correctness and user experience.

SPECIALIZATION

API

REST API testing, integrations and data validation.

LOGS

Analyzing defects, events, and service-to-service communication.

UX

Usability, interface consistency and user experience.

AUTOMATION

Playwright + TypeScript in CI/CD workflows.

PROFESSIONAL EXPERIENCE

QA Engineer

Trans.eu

01.2025 - present

- Building team trust and strengthening project ownership, with organizational support for my development toward test automation.
- Testing REST APIs in Postman: JSON validation, HTTP status codes, token authorization, edge cases, and data consistency.
- Analyzing backend logs in Kibana and diagnosing defects affecting service stability.
- Monitoring service-to-service communication via RabbitMQ and verifying backend integrations.
- Creating and maintaining test cases, scenarios, and technical documentation in Xray and Confluence.
- Executing E2E, functional, and UAT tests for frontend, backend, and mobile applications.
- Working with CI/CD pipelines in Jenkins and analyzing automated test results.
- Developing test automation using Playwright and TypeScript.
- Supporting product quality from UX/UI and end-user experience perspectives.

Manual Tester

Necto

12.2022 - 08.2024

- Designing test strategies for functional, regression, integration, and acceptance testing.
- Testing web and mobile applications and verifying REST API completeness.
- Reporting defects in Jira and YouTrack, including root cause analysis and proposed solutions.
- Data validation and SQL query analysis in PostgreSQL and MS SQL Server.
- Analyzing frontend issues in DevTools: console, cookies, sessions, DOM and responsiveness.
- Conducting UX/UI usability testing and recommending user experience improvements.
- Supporting business and operational users while analyzing tickets in ERP and Intense systems.

Junior Project Specialist

Trigonum

10.2022 - 11.2022

- Creating and updating project documentation compliant with EU requirements (ERDF, ESF), with a focus on quality and formal compliance.
- Managing financial settlements, monitoring project costs, and analyzing large datasets.
- Creating MS Excel spreadsheets using advanced formulas, logical functions, and pivot tables.

HR Specialist

Trigonum

11.2021 - 10.2022

- Managing full recruitment processes: job ads, application screening, interviews and candidate feedback.
- Organizing onboarding, preparing workstations and supporting new employee adaptation.
- Creating and optimizing tools for working time analysis and project efficiency tracking.
- Supervising medical examinations, occupational health and safety training, and compliance with labor law.
- Maintaining HR documentation, PPK registers, and HR reports, including work in the Płatnik system.
- Coordinating internship agreements within the "Kariera Jutra" program: documentation, communication with institutions, and process supervision.

TECHNOLOGIES

QA & API

REST API, Postman, Swagger, Xray, Jira, YouTrack

Test Automation

Playwright, TypeScript

Backend & Delivery

RabbitMQ, Kibana, Jenkins, CI/CD, DevTools, GitLab

Data

SQL, PostgreSQL, MS SQL Server

UX/UI Perspective

Figma, UX Research, Usability Testing, Webflow

QA IMPACT

AUTOMATION

AUTO

Automation in practice

Developing automated tests with Playwright and TypeScript.

TRUST

Growing project ownership

Positive feedback and increasing responsibility at Trans.eu.

QUALITY

E2E

End-to-end mindset

Connecting technical correctness with the end-user experience.

● QUALITY STANDARD

Requirements Analysis

acceptance criteria, risks, edge cases

Test Design

scenarios, regression, E2E, UAT, integrations

Defect Lifecycle

reproduction, priority, root cause, retest

Release Readiness

documentation, monitoring, product stability

● PERSONAL SKILLS

Analytical and critical thinking

Curiosity and root cause analysis

Precision and quality focus

Solving complex problems

Ownership and independence

Technical and business communication

Cross-team collaboration

● EDUCATION AND ACTIVITIES
